Wall fixing - if in doubt seek professional advice

Secure mirror to a suitable wall by using appropriate wall plug and screw (not included)

Wood
If fixing to wood
make sure that it
isn't chipboard as
screws can easily
pull away from the
core structure

Brick or Masonry
Use an appropriate
wall plug provided you
are sure your wall is
sound.

Cavity wall
Special toggle
wall plugs are
needed. Seek
expert advice.

Care and Maintenance

This product has been manufactured using modern manufacturing methods and materials.

To keep your product, looking at its best, we strongly recommend either dusting with a soft cloth, or the use of a damp (not wet) cloth and water containing no more than a 5% soap solution.
Dry with a soft clean cloth.

Aggressive chemicals, such as wax furniture polish, abrasive cleaners, bleach or hypochlorate (chlorine) based cleaners, multi purpose cleaners, dilutes, acetone, alcohol and solvent based liquid product should NOT be used, as may result in damage.

Wall Mounting & Fixings

IMPORTANT:

When drilling into walls always check that there are no hidden wires or pipes etc. Make sure that the screws and wall plugs being used are suitable for supporting your unit. Consult a qualified tradesperson if you are unsure.

HINTS:

- 1) General Rule  Always use a larger screw and wall plug if you are not sure.
- 2) Ensure you use the recommended drill bit to match the wall plug and hole size.
- 3) Ensure you drill the hole horizontally, do not force the drill or enlarge the hole.
- 4) Take extra care when drilling high walls, ceilings and ceramic tiles. Ensure the plug is fitting below the ceramic tile to avoid splitting or cracking.
- 5) Ensure wall plugs are well fitted and are a tight fit in the drilled hole.

Types Of Walls

You can use one of the following types of wall plug if your walls are made of brick, breeze block, concrete, stone, wood or plaster board.

No.1 "Standard" Wall Plug General Wall Materials

These come in various sizes and are made from plastic or sometimes wood fiber.

No.2 "General Purpose" Wall Plug Aerated / Breeze Block

Generally aerated blocks should not be used to support heavy loads, use a specialist fitting in this case. For light loads, a General Purpose Plug can be used.

No.3 "Shield Anchor" Wall Plug Heavy Loads

For use with heavier loads such as TV & HiFi Speakers and Satellite Dishes etc.

No.4 "Cavity Fixing" Wall Plug

For use with plaster board partitions or hollow wooden doors.

No.5 "Cavity Fixing - Heavy Duty" Wall Plug

For use when fitting or supporting heavy loads such as shelving, wall cabinets, coat racks.

No.6 "Hammer Fixing" Wall Plug

For use with walls stuck with plaster board. The hammer fixing allows it to be fixed to the wall rather than the plaster board. Always check the fixing is secure to the retaining wall.

CARE & MAINTENANCE

SAFETY

Always check the fitting and location to ensure your safety in and around the home.

FITTING

From time to time check the fitting to ensure the wall plugs or screws do not become loose.
