

Keely Spotlight

Installation Instructions

Thank you for purchasing this Keely spotlight. Please read the instructions carefully before use to ensure safe and satisfactory operation of this product.

Please keep these instruction for future reference.

Warnings!

This is a Class I product and must be earthed.

Please read these instructions carefully before commencing any work. It is recommended that this fitting is installed by a qualified electrician.

Install in accordance with the IEE Wiring regulations and the Building Regulations and mounted out of arms reach.

To prevent electrocution switch off at mains supply before installing or maintaining this fitting. Ensure other persons cannot restore the electrical supply without your knowledge. If you are in any doubt, please consult a qualified electrician.

This light fitting should be connected to a 5 amp fused circuit.

If replacing an existing fitting, make a note of the connections.

Always use the correct type and wattage bulb. Never exceed the wattage stated.

When changing a bulb or adjusting the heads, always switch off at the mains and allow to cool down.

Dispose of used bulbs carefully.

This product is suitable for indoor use only, on normal flammable surfaces, as indicated by this symbol.  e.g. wood, plasterboard and masonry. It is not suitable for use on highly flammable surfaces (e.g. polystyrene, textiles).

We do not recommend locating spotlights in bathrooms (due to the risk of broken glass in the event a bulb breaks).

Siting Instructions

SPOTLIGHTS GIVE A CONCENTRATED BEAM OF LIGHT AND MUST NOT BE POSITIONED ANY CLOSER THAN 0.5M (50CM) TO THE ILLUMINATED SURFACE.

Using a dimmer switch with your spotlight

This product is suitable for use with a dimmer.

Fixing Instructions

Make sure you have the following items which are required to install this light fitting:

Small electrical screwdriver, cross head screwdriver & insulation tape.

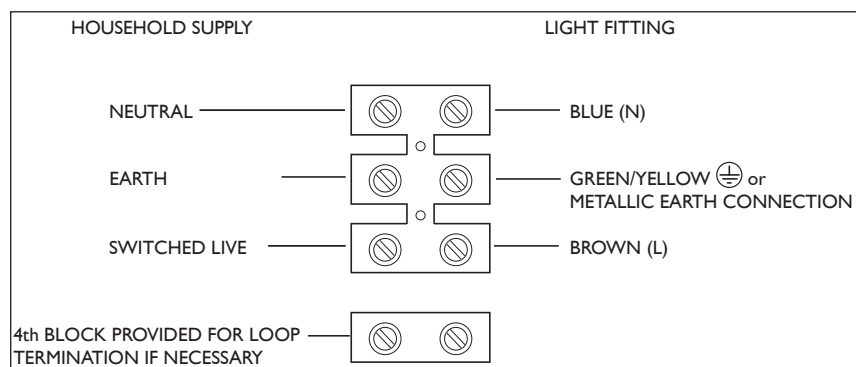

The installation of this fitting will be much easier with the help of an assistant.

Step 1

Existing ceiling roses must be completely removed before installation of a new product. Before removing the existing fitting or ceiling rose, carefully note the position of each set of wires. Where a ring/loop circuit exists there will be a fourth set of wires (usually red) that are not connected to the L, N, or E. of the fitting. This circuit must be kept together in the 4th terminal of the connection block, and insulated from the fitting and the other wires. The ring/loop will remain live unless isolated at the mains or circuit breaker regardless of the position of the wall switch.

Step 2

Having identified the household wiring from your existing light fitting, connect to the connection block inside the product in the following way:

Check that.....

You have correctly identified the house wires.

The connections are tight.

No loose strands have been left out of the connection block.

Step 3

When completed, ensure that there are no bare or loose strands of wire exposed, and cover all exposed areas of the connection block with 2 layers of insulation tape.

Step 4

Locate the fixing screws through the white plastic plugs in the ceiling cover and screw directly into the ceiling making sure that there is a joist at the point of fixing. Take care not to trap or damage any wiring. Apply the chrome finish screw caps to the screw heads once attached to the ceiling.

Fitting/Replacing the bulbs

During use the bulb and light fitting get very hot. Always switch off at the mains and allow the bulb to cool before replacing. Use a cloth when handling bulbs as contact with bare hands will reduce the bulb life. Always use replacement bulbs of the same type and never exceed maximum wattage. Dispose of used bulbs carefully.

Push-in and twist anti-clockwise to remove.

Step 5

Replace fuse or circuit breaker and switch on. Your light is now ready for use.

Care and cleaning

Finish - We recommend cleaning with a soft dry cloth. Do not use abrasive materials as these will damage the finish.

Safety Information

For your safety, always switch off the supply before changing lightbulbs or cleaning.

We have taken great care to ensure that this product reaches you in perfect condition. However, should any parts be damaged or missing please contact our Product Helpline on (01202) 690945. We will despatch to you, within 7 working days, your missing/damaged part. When phoning please ensure you have the following information available: Name and Address, Daytime Telephone Number, Store and Date of Purchase, Product Reference (inside ceiling cover or on box label), Description of Missing/Damaged Part. This does not affect your statutory rights.
