

## Assembly instructions for Brandon Floor standard

Thank you for purchasing this Brandon Floor Standard. Please read the instructions and warnings carefully before use to ensure safe and satisfactory operation of this product.

### Warning

Please read these instructions carefully before commencing any work.

Always use the correct type and wattage bulb. Never exceed the wattage stated.

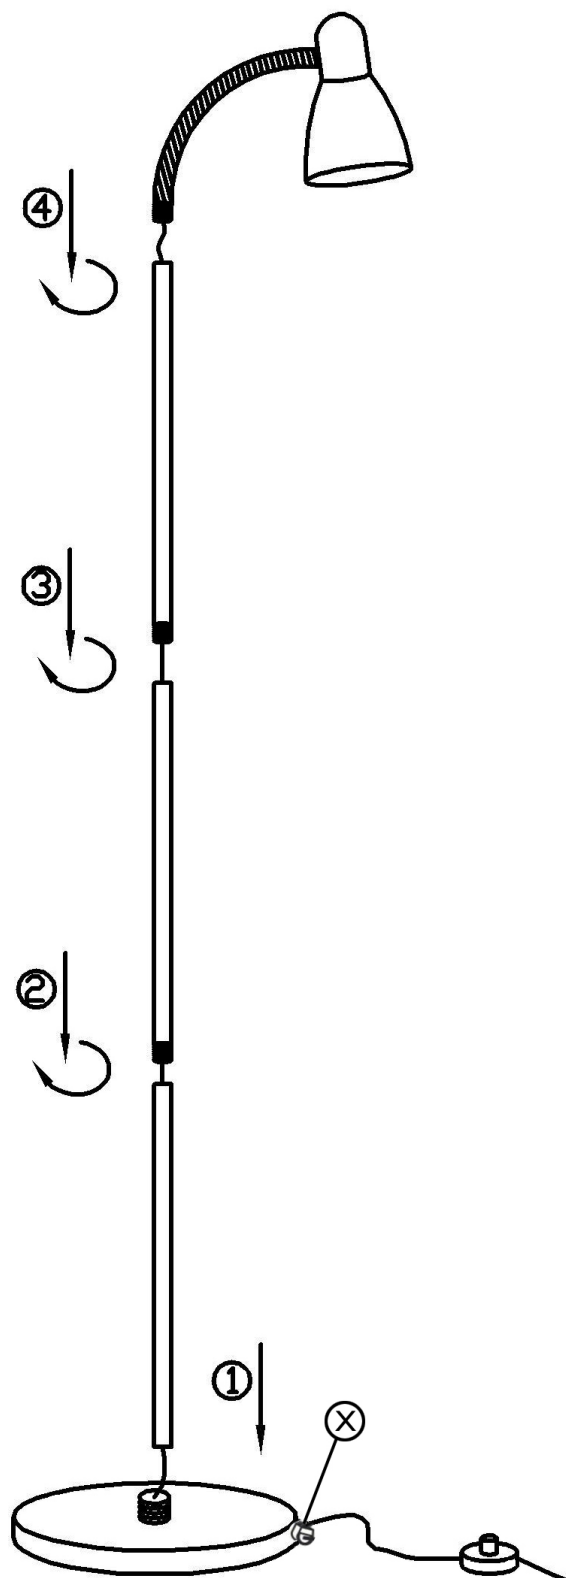

When changing the bulb, ensure the product is unplugged and always allow the old bulb to cool down before handling. Dispose of used bulbs carefully.

Keep instructions for future reference.

Your standard lamp has been packaged as five separate parts to prevent damage during transit.

Please follow these assembly instructions carefully:

- 1) Remove all packaging from the base, the central tubes and the top assembly.
- 2) Screw top assembly 4 on to tube 3, then screw on tube 2 and 1. Take care not to trap the cable or cross the thread, firmly tighten the tube by hand. Check all joints are tight.
- 3) Pull any excess cable through from the underside of the base. Turn completed assembly anticlockwise approximately 6 times (Turning the tube anticlockwise first, ensures that the cable will straighten when tubes are fully assembled). Screw assembly in a clockwise direction on to the base. Take care not to trap the cable or cross the thread, firmly tighten the tube by hand.
- 4) Gently pull the remaining slack cable through from the underside of the base. Tighten cable cord screw (X).
- 5) Fit a suitable 60W ES GLS bulb or 11W ES energy saver light bulb. Do not exceed the wattage as recommended as this may cause damage to the light fitting.
- 6) Your standard lamp is now ready for use.
- 7) Switch on using floor switch.

We have taken great care to ensure that this product reaches you in perfect condition. However, should any parts be damaged or missing please contact our Product Helpline on (01202) 690945. We will despatch to you, within 7 working days, your missing/damaged part.
