Rinse both parts under running water and dry thoroughly.

Remove the condensate container and hold it level.

For domestic use only.

Pull out both parts of the fluff filter.

- Reduced temperature for delicate fabrics that require a longer drying time; e.g. polyacrylcs, polyamide, elastane, acetate silk.
Emptying condensation
Empty the container after each drying cycle, not during drying.
1. Remove the condensate container and hold it level.
2. Pour out the condensation.
3. Always push container in fully until it clicks into place.
   If the Container indicator lamp flashes despite the container having been emptied → Filter in condensate container, page 9.

Cleaning the fluff filter

The fluff filter consists of two parts. Clean the inner and outer filter after every drying cycle:
1. Open the door. Remove fluff from the door/door area.
2. Pull out both parts of the fluff filter.
3. Remove fluff from the edge of the shaft. Fluff should not fall into the open shaft.
4. Open the filter and remove all the fluff.
5. Rinse both parts under running water and dry thoroughly.
6. Close the inner and outer filter, put them back together and reinsert them into the appliance.

Switching off the dryer
Turn the programme selector to Off. Do not leave laundry in the dryer.

Removing the laundry
Your dryer is equipped with an automatic reduced ironing function. The drum is moved at specific time intervals for 60 minutes once the programme has ended. The laundry stays loose and fluffy (or 120 minutes if the additional Less ironing function is selected (depending on model)).

End of programme as soon as the Anti-Crease/End indicator lamp lights up.

Interrupt programme Adding or removing laundry.
1. Open the door. The drying process is interrupted.
2. Add or remove laundry then close the door.
3. If required, select a new programme and additional functions.
4. Press the Start/Stop button.

Do not pull out/empty the condensate container when drying is in progress.
Information on laundry ...

Labelling of fabrics

Follow the manufacturer’s care information.

- Dry at normal temperature.
- Dry at low temperature → in addition, select Low Heat ².
- Do not machine dry.

Always observe the safety instructions on page 13.

Drying tips

- To ensure an even result, sort the laundry by fabric type and drying programme.
- Always dry very small fabrics (e.g. baby socks) together with large items of laundry (e.g. towels).
- Close zips, hooks and eyelets, and button up covers. Tie fabric belts, apron strings, etc. together.
- Do not over-dry easy-care laundry → Risk of creasing. Allow laundry to finish drying in the air.
- Do not dry woollens in the dryer. They may, however, be refreshed → page 7 Wool finish programme (depending on model).
- Do not iron laundry immediately after drying; fold items up and leave for a while → residual moisture will then be distributed evenly.
- The drying result depends on the type of water used during washing. → Fine adjustment of the drying result → page 6.
- Knitted fabrics (e.g. T-shirts, jerseys) often shrink slightly the first time they are tumble-dried. → Do not use the Extra Dry programme.
- The drying of starched laundry should be limited. → Starch leaves behind a coating that impairs drying.
- When washing laundry that is to be tumble-dried afterwards, use the correct amount of fabric softener as specified in the manufacturer's instructions.
- For pre-dried, multi-layered fabrics or small, individual items of laundry, use the Timed programme. Also suitable for subsequent drying.

Environmental protection / Energy-saving tips

- Before drying, spin the laundry thoroughly in the washing machine → the higher the spin speed, the shorter the drying time will be, thus less energy is consumed. Also spin easy-care laundry.
- Use the maximum recommended capacity, but do not exceed it → Programme overview → page 7.
- Make sure the room is well ventilated during drying.
- Do not cover or seal the air inlet.

Button signals

Setting the volume for button signals

| Turn to Off | 1 x to the right | Press and hold Low Heat ² and turn 2 x to the right | Press ① Start/Stop until the required volume is reached | Turn to Off |

Selectable values: off, quiet, medium, loud, very loud.

Fine adjustment of the drying result

Adjustment of the levels of dryness

Turn to Off | 1 x to the right | Press and hold Low Heat ² and turn 5 x to the right | Press Low Heat ² until the required level is reached | Turn to Off

Drying, Iron Dry, Cupboard Dry, Anti-Crease/End are displayed in sequence.
Short signal when changing from level 3 to 0, otherwise long signal.

Important Information

Your dryer is designed to be particularly energy efficient. Its technical features include a refrigeration circuit, which uses energy efficiently in a similar way to a refrigerator.
The dryer's heat exchanger is cleaned automatically during drying.
The fluff filters and filter in the condensate container must be cleaned regularly.

Never operate the dryer without the fluff filters and without filter in condensate container.

- Fluff filters
  During drying, fluff and hair from the laundry is trapped by the fluff filter. Blocked fluff filters may impair the heat exchange process.
The fluff filters must therefore be cleaned after every drying cycle. Rinse regularly under running water → page 4.

- Filter in the condensate container
  The filter in the condensate container cleans the condensation. This condensation is required for the automatic cleaning process. The filter should be cleaned regularly under running water. Empty the condensate container before cleaning the filter → page 4/9.

- Fabrics
  Do not dry any fabrics that have come into contact with solvents, oil, wax, grease or paint: e.g. hair styling products, nail varnish remover, stain remover, cleaning solvent, etc. Empty all pockets.
  Do not dry non-breathable fabrics.
  Avoid drying items that produce a lot of fluff.
  Woollens should be refreshed only, using the woolens programme.
Programme overview see also page 5.

Sort the laundry according to type of textile and fabric. Fabrics must be suitable for tumble drying.

### PROGRAMMES

<table>
<thead>
<tr>
<th>TEXTILE TYPE AND INFORMATION</th>
<th>PROGRAMMES</th>
<th>TEXTILE TYPE</th>
<th>INFORMATION</th>
</tr>
</thead>
<tbody>
<tr>
<td><em>Cottons</em> max. 7 kg</td>
<td>Hard-wearing fabrics, boil-proof fabrics made of cotton or linen.</td>
<td></td>
<td></td>
</tr>
<tr>
<td><em>Easy-Care</em> max. 3.5 kg</td>
<td>Non-iron laundry made of synthetic fibres and mixed fabric, easy-care cotton.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Iron Dry</td>
<td>The condition of the laundry means it is suitable for ironing (iron clothes in order to avoid creases).</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Cupboard Dry</td>
<td>For single-layered laundry.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Extra Dry</td>
<td>For laundry with thick, multi-layered parts.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>☀ SuperQuick 40' max. 1 kg</td>
<td>Laundry which needs to be dried quickly, e.g. made from synthetics, cotton or mixed fabrics. The values may deviate from the values shown here, because of type of fabric, composition of the laundry to be dried, residual moisture in the material and size of the load.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Wool finish max. 3 kg</td>
<td>Woollen fabrics suitable for washing machines. Fabrics become fluffier but not dry. Remove fabrics once the programme has ended and allow to dry.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>☀ Timed Programme warm 30 min max. 3 kg</td>
<td>All types of fabric; time programme. Suitable for pre-dried or slightly damp laundry and for drying off multi-layered, thick laundry. Only dry wool, sports shoes and soft toys with the basket for woolens (Optional Accessories, page 10). In the time programme, the laundry's residual moisture is not automatically detected. If the laundry is still too damp after the drying programme, repeat the programme.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

*Dryness levels can be selected individually Extra Dry, Cupboard Dry and Iron Dry (depending on the model). Degree of dryness can be finely adjusted; multi-layered textiles require a longer drying time than single-layered items of clothing. Recommendation: Dry separately.*
Installation

- Scope of delivery: dryer, installation and operating instructions, woolens basket (depending on model).
- Check dryer for transport damage.
- The dryer is very heavy. Do not attempt to lift it on your own.
- Be careful to avoid sharp edges.
- Do not set up in a room that is susceptible to frost. Freezing water may cause damage.
- If in doubt, have the appliance connected by a specialist.
- Do not lift the dryer by protruding parts (e.g. the door) - risk of breakage.

Setting up the dryer
- The appliance plug must always be accessible.
- Ensure that the appliance is installed on a clean, level and firm surface.
- Do not obstruct the air inlet on the front of the dryer.
- Keep the area around the dryer clean.
- Make the dryer level using the threaded feet and a spirit level.
- Do not remove the threaded feet under any circumstances.

1. Take all accessory parts out of the drum. The drum must be empty.

Do not set up the dryer behind a door or sliding door, as this may obstruct the dryer door or prevent it from opening. This will prevent a potentially fatal danger to children from locking themselves in.

Mains connection
- Connect to an AC earthed socket. If in doubt have the socket checked by a specialist.
- The mains voltage and the voltage shown on the rating plate (page 10) must be the same.
- The connected load and necessary fuse protection are specified on the rating plate.

Frost protection / Transport
- Do not operate the dryer if there is a danger of frost.

Frost protection - preparation
1. Empty the condensate container → page 4.
2. Select any programme using the programme selector.
3. Press the Start/Stop button → condensed water is pumped into the container
4. Wait 5 minutes and then empty the condensate container again.
5. Turn the programme selector to Off.

Transport
- Prepare the dryer → see Frost protection - preparation.
- Transport the dryer in a vertical upright position.
- Following transportation, do not use the dryer for two hours.
- The dryer contains residual water; this can flow out if the dryer is tilted.

Signal

Switching on/off an acoustic signal at the end of the programme

- Turn to Off 1 x to the right
- Press and hold Low heat ↑ and turn 3 x to the right
- Press Low heat ↑ to switch on/off the signal
- Turn to Off

Low heat ↑ light on → an acoustic signal at the end of the programme is switched on.
Low heat ↑ light off → an acoustic signal at the end of the programme is switched off.

Care and cleaning

Heat exchanger
- The dryer’s heat exchanger is cleaned automatically during drying.
- Do not pull out the condensate container during the cleaning process.

Dryer housing, control panel, air intake
- Wipe with a soft, damp cloth.
- Do not use harsh cleaning agents or solvents.
- Remove detergent and cleaning agent residue immediately.

Filter in the condensate container
- The filter is cleaned automatically when the condensate container is emptied.
However, the filter should still be cleaned regularly under running water → This prevents stubborn deposits/dirt from building up.

1. Pull out the condensate container.
2. Pull the filter out of its snap-in lock.
3. Clean the filter under running water or in the dishwasher.
4. Refit the filter.
5. Insert the condensate container so that it locks into place.

Moisture sensor
- The dryer is equipped with stainless steel moisture sensors. Moisture sensors measure how damp the laundry is. A thin layer of limescale may build up on the moisture sensors after prolonged use.

1. Open the door.
2. Clean the moisture sensors using a damp sponge with a rough surface.

Only operate the dryer with the filter inserted.
- Do not use steel wool or abrasive materials.
**Technical Data**

- **Dimensions (DxWxH)**: 60 x 60 x 85 cm (height adjustable)
- **Weight**: approx. 51 kg
- **Max. capacity**: 7 kg
- **Condensate container**: 4.0 l
- **Connected load**: max. 800 W
- **Fuse protection**: 10 A
- **Ambient temperature**: 5 - 35°C
- **Product number**: Inside of door
- **Power consumption when switched off**: 0.10 W
- **Power consumption when ready for use (left-on mode)**: 1.00 W
- **Drum interior light**: (depending on model): The drum lights up after the door is opened and after the programme starts, and switches off automatically.

</table>

* Programme setting for testing in accordance with the applicable EN61121 standard.
** The values may differ from those specified, depending on the type of fabric, composition of laundry to be dried, residual moisture in the fabric and the amount of laundry being loaded.

**Most efficient programme for cotton fabrics**

The following "standard cottons programme" (identified with □) is suitable for drying normal, wet cotton laundry and is most efficient in terms of its combined energy consumption for drying wet cotton laundry.

**Standard programme for cottons in accordance with current EU regulation 932/2012**

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

Programme setting for testing and energy labelling in accordance with Directive 2010/30/EU.

**Optional accessories** (order from the after-sales service using the order number, depending on the model)

- **Washer-dryer stack connection set**
  - The dryer can be placed on top of a suitable washing machine with the same width and depth to save space. The dryer must be fastened to the washing machine using this connection set. WITZ 11400: with pull-out worktop.

- **Installation underneath the worktop**
  - Instead of the appliance covering plate, you must have a metal cover fitted by a specialist.

- **Platform**
  - For easier loading and unloading. The basket contained in the drawer can be used to carry the laundry.

- **Wollens basket**
  - For drying individual woolen fabrics, sports shoes and soft toys (see separate instructions for "Wollens basket").

**Normal noises**

During drying, the compressor and the pump generate some noise which is entirely normal.

- The compressor in the dryer may occasionally generate a humming noise. The volume and pitch of this may vary depending on the selected programmes and the progress of the drying.

- The automatic cleaning process causes a clicking noise.

- The process of pumping the condensation into the condensate container generates pumping noises.
If you cannot rectify a fault yourself (e.g. switching off/on), please contact our after-sales service. We will always find an appropriate solution and will avoid unnecessary visits by engineers. Trust the expertise of the manufacturer and rest assured that the repair will be carried out by trained service technicians using original spare parts. The contact details of your local after-sales service can be found in the enclosed after-sales service directory, or by calling one of these numbers:
- GB 0344 892 8979 (Calls charged at local or mobile rate).
- JE 01450 2665 (0.03 € per minute at peak. Off-peak 0.0088 € per minute).

When contacting the after-sales service, please quote the appliance's product number (E no.) and production number (FD) (see under the loading door).

Turn the programme selector to Off and unplug the mains plug from the socket.

- **Start/Stop indicator lamp does not light up.** Mains plug plugged in? Programme selected? Check the socket fuse.
- **The display panel light and indicator lights (depending on model) go out and the Start/Stop indicator light flashes.** Energy-saving mode is activated → see the separate Energy-saving mode instructions.
- **The Container indicator lamp and the Start/Stop button are flashing.** Empty the condensate container → page 4. Clean the condensate container filter if necessary → page 9. Dryer transported? → Wait 2 hours and start again.
- **The Clean indicator lamp and the Start/Stop button are flashing.** Rinse the fluff filter under running water → page 4.

**Dryer does not start.**
- **Start/Stop button selected?** Door closed? Programme set? Ambient temperature greater than 5 °C?

Water is leaking out.
- Make sure the dryer is level.

The door opens by itself.
- Push the door closed until you hear it click into place.

**Creasing.**
- Laundry load exceeded? Remove articles of clothing immediately after the end of the programme, hang up and pull into shape. Unsuitable programme selected → page 7.

Laundry is not dried correctly or is still too damp.
- After the end of the programme, warm laundry feels damper than it actually is. Spread the laundry out and allow the heat to dissipate. Finely adjust the dryness level – this extends the drying time but does not increase the temperature. Your laundry will become drier. Select a programme with a longer drying time or increase the drying level. Select a programme for extended drying of laundry that is still damp. If you have exceeded the maximum load for the programme, the laundry may not be dried correctly. Clean the moisture sensor in the drum. A fine layer of limescale allows the heat to dissipate. Be careful as the door, the drum and the condensate container is full or because the maximum drying time has been exceeded.

Drying time too long.
- Rinse the fluff filters under running water → page 4. Insufficient supply of air → ensure that air can circulate. Air inlet possibly blocked → Clear inlet → page 8.

The humidity in the room increases significantly.
- Make sure the room is sufficiently ventilated.

Power failure.
- Remove laundry from the dryer immediately and spread out. This allows the heat to dissipate. Be careful as the door, the drum and the laundry may be hot.

Other intermittent noises and vibrations.

Loud humming noise for several seconds.
- Has the condensate container been properly inserted? → Push the condensate container all the way in. Not an error. Normal noises → page 11.

Installation
- Secure loose cables → Risk of tripping.
- Do not operate a dryer if there is a risk of frost.
- Connect the dryer to an AC earthed socket according to specifications, otherwise it cannot be guaranteed that the appliance is completely safe. The cable cross-section must be sufficient.
- Only use earth-leakage circuit breakers with the following symbol:
- The appliance plug and socket must be compatible.
- Do not use multiple plugs/connectors and/or extension cables.
- Do not touch or hold the appliance plug with wet hands → Risk of electric shock.
- Never pull the appliance plug out of the socket by its cable.
- Do not damage the mains lead → Risk of electric shock.

Operation
- Only load the drum with laundry.
- Check the contents before you switch the dryer on.
- Do not use the dryer if the laundry has been in contact with solvents, oil, wax, grease or paint (e.g. hair styling products, nail varnish remover, stain remover, cleaning solvent, etc.) → Risk of fire/explosion.
- Do not use multiple plugs/connectors and/or extension cables.
- Do not damage the mains lead → Risk of electric shock.
- Do not use the dryer for purposes other than those described above.
- Do not turn off the dryer until the drying process ends, unless the laundry will be removed quickly and spread out, so that the heat can dissipate.
- When cleaning the fluff filter, make sure that no foreign material (down or filling material) gets into the air duct opening. If necessary, clean the drum beforehand with a vacuum cleaner. If foreign material should still get into the air duct → call the after-sales service → Risk of fire/explosion.
- Light things, such as long hair, may be sucked into the air inlet of the dryer → Risk of injury.
- Final part of a tumble dryer cycle occurs without heat (cool down cycle), to ensure that the items are left at a temperature that ensures that the items will not be damaged.
- Switch off the dryer once the programme has ended.
- The water from condensation is not drinking water and may be contaminated with fluff.

Spare parts
- Only use genuine spare parts and accessories for safety reasons.

Disposal
- Pull out the appliance plug, then cut off the mains cable from the appliance.
- Dispose of at a municipal waste disposal facility.
- The dryer’s heat exchanger contains fluorinated greenhouse (R134a) gas. It is hermetically sealed unit → disposal of in a proper manner. Capacity: 0.22 kg.
- Packaging: Keep all packaging out of reach of babies and children → Risk of suffocation.
- All materials are environmentally sound and can be reused. Dispose of in an environmentally-responsible manner.
Operating and installation instructions
