

Al Bombo

design Stefano Giovannoni

SD240

Thank you

for purchasing this Magis Al Bombo. Please read the instructions and warnings carefully before use to ensure safe and satisfactory operation of this product.

Care and Maintenance

To clean fingerprints use just a soft cloth, without any liquids or other cleaning products. Should you wish to revitalise the brilliance of the aluminium an Al Bombo Kit is available to purchase separately.

Please avoid any use of alcohol, acetone, trichloroethylene, ammonia and/or other detergents containing even small quantities of these substances.

The stool's column should be periodically lubricated with white vaseline oil in order to assist with the continued smooth operation of the gas-lift mechanism.

Height adjustment

To lower, raise the lever while sitting on the stool.

To raise, pull up the lever without placing any weight on the stool.

Important safety note:

DO NOT:

- use the stool as a ladder.
- climb on the stool.
- stand on the foot-rest of the stool, as this could lead to the stool becoming unbalanced and overturning.

DO NOT

- leave the stool outdoors.
- use different cleaning products from the ones mentioned above.
- use the product in an improper way (for example do not place hot containers on it etc.).

DO

Ensure that feet are kept clear from the bottom of the stool when attempting to move the stool, as the base may detach.

For further queries regarding the maintenance or repair of this item, please contact your retailer. Please ensure this item is disposed of in an environmentally-friendly fashion.
