

## Heating formats

All John Lewis towel rails come in three formats; central heating, electric and dual fuel systems.

### Central heating

The towel rail is plumbed into the central heating system like a standard radiator. Valves need to be fitted to connect the rail with the central heating system.

### Electric

Uses an electrical element to heat fluid within the towel rail and will need to be connected to your electrical system by a qualified electrician

### Dual fuel

The towel rail is plumbed into the central heating system and also connected to the

electricity supply. This means you can heat your towel rail without needing to turn on your whole heating system.

### Valves

Once you have chosen your heating format, you'll also need to choose a valve type.

### Standard valves

Whether the pipes in your bathroom come from the floor or the wall will determine the type of valve you need. Some towel rails have specific valves and some valves are slim, maximising space in your room.

### Thermostatically controlled valves

These valves allow you to control and adjust the temperature of your towel rail. Adjustable valves are available in all heating formats.

### Brackets

All our towel rails come with standard brackets so they can be fixed to the wall. Short and adjustable brackets are also available. Please ask in store for more details.

## Fitting service

We offer a service to plan and fit your bathroom to meet your needs and maximise your available space. If you wish us to plan and fit your bathroom please go on line for more details at [johnlewis.com/fittedbathrooms](http://johnlewis.com/fittedbathrooms). Alternatively, you can order your chosen bathroom as supply only.

## Guarantees

All of your bathroom ranges and products come with a guarantee included at no extra cost. The length of the guarantee depends on the product so please contact your nearest John Lewis shop for more information.

Our heated towel rails and radiators don't just keep your bathroom and towels warm, they look great too.

There's a design to make the most of every bathroom, whatever the size or shape. Choose from super-slim styles that are great for tight spaces, contemporary ladder designs, and towel rails with ingenious built-in shelves for extra storage. And because there's no such thing as one size fits all, most styles come in a wide range of sizes too.

What's more, all towel rails and radiators are made from 100% stainless steel and are guaranteed for 25 years at no extra cost
