# CRANE | Garden Studio

The Garden Studio is an ideal home office, a hobby room or even a gym. Our Studio combines the natural beauty of timber and glass to provide your perfect space without the frustration of building works.

Bring the outside in. Have your Studio open and airy with light flooding in from our fully glazed panels. Finished in a choice of either sage or cream-coloured micro-porous paint, the Garden Studio is the perfect living extension for all homes.

# CRANE | Garden Workshops

The Garden Workshop is ideal for secure storage, as a workshop or hobby room. These workshops are renowned for strength and durability and are finished to the highest standard. The doors are hung with the use of 'T' hinges with security screws and secured with a unique master lock.

The building is fully treated both internally and externally with a medium oak preservative, and is available with the additional option of a sage-coloured micro-porous paint finish.

The 3.0 x 3.6m Workshop comes complete with framed, ledged and braced double doors measuring H179cm x W150cm. The 2.4 x 3.0m Workshop comes complete with a single framed, ledged and braced door measuring H179cm x W85cm.

## Key Features

***Crane Sheds and Summerhouses*** have been manufacturing sheds in Norfolk for over 35 years and are a market leader in producing high quality timber buildings of all types. Our name is synonymous with strength, style and customer service.

We manufacture all our buildings in Norfolk.

***Crane Sheds and Summerhouses*** have expanded from a small family run business. With little advertising over the years, we are proud to acknowledge that much of our business is through word of mouth. We firmly believe this is because of our ethos on providing a personal service where the customer always comes first. This is a well practiced belief that has not changed even though we now operate on a nation-wide basis.

**Delivery and installation** is carried out by our own experienced delivery team.

**Considerations** - Although all our buildings come complete with a timber floor, we also require a level, solid, square base of either paving slabs or concrete upon which to install them. We must be advised in advance of any difficulties concerning access. All measurements are nominal. Please see [Johnlewis.com](http://Johnlewis.com) for further details.

To request a sample wood swatch for colour reference, please email [jlp@craneshedsandssummerhouses.co.uk](mailto:jlp@craneshedsandssummerhouses.co.uk)
