CLIMATE COLLECTION

Uniquely designed to regulate the surface temperature of the mattress while providing head to toe pressure relief.

The **Climate Collection** is designed to regulate mattress surface temperature while you sleep. Materials made with patented phase-change crystals and infused with copper beads store and release the heat produced by your body to regulate temperature. Copper is naturally antibacterial and superconductive, acting as a thermal pathway to move heat to and from the surface.

At John Lewis & Partners we care about our furniture, from how it is designed, the materials used and the people who make it. That is why every detail is carefully considered to ensure you're as proud of it as we are.

No custom sizes or zip and link options available.
