Please read these instructions carefully before commencing any work.
For your safety, always switch off the supply before cleaning or adjusting.
If you are in any doubt, please consult a qualified electrician.

Parts list	Image	Qty
Light fitting		1

Assembly

Refer to assembly drawing opposite. Carefully unpack the carton, making sure all the parts are present before assembly. Gently pull away any protectors from the ends of the tubes. The fitting has been packaged as five separate parts to prevent damage during transit; please ensure all packaging has been removed

Step 1

Screw top assembly (4) on to tube (3), then screw on tube (2) and (1).
Take care not to trap the cable or cross the thread, firmly tighten the tube by hand.
Check all joints are tight.

Step 2

Pull any excess cable through from the underside of the base. Turn completed assembly anticlockwise approximately 6 times (Turning the tube anticlockwise first, ensures that the cable will straighten when tubes are fully assembled). Screw assembly in a clockwise direction on to the base. Take care not to trap the cable or cross the thread, firmly tighten the tube by hand.

Step 3

Gently pull the remaining slack cable through from the underside of the base. Tighten cable cord screw (X).

Step 5

Fit the bulb as per the instructions overleaf.
Do not exceed the wattage as recommended as this may cause damage to the light fitting.

Step 6

Your standard lamp is now ready to use. Switch on using the floor switch.

Care instructions

We recommend cleaning with a soft dry cloth. Do not use abrasive materials as these will damage the finish.
