### Care and maintenance

#### How to care for your wood furniture

Furniture with a hard lacquer, wax polish or painted surface should be dusted with a dry cloth.

Spray polishes are best avoided as they contain silicones which may spoil the furniture's surface by building up over time. Wipe up spills immediately. If sticky marks occur on the surface they can be removed with a dilute solution of warm soapy water.

Our furniture will endure most temperatures in the home but it is best to avoid placing furniture next to heat sources such as radiators or fires. Be particularly careful with solid wood as the lack of humidity caused by central heating can cause damage such as warping.

### Safety Instructions

Never drag furniture when moving it, always lift it. Please take care when handling or moving the furniture as careless handling may cause damage or injury. No liability will be accepted for damage or injury caused by incorrectly installed furniture.
