## PRODUCT CARE

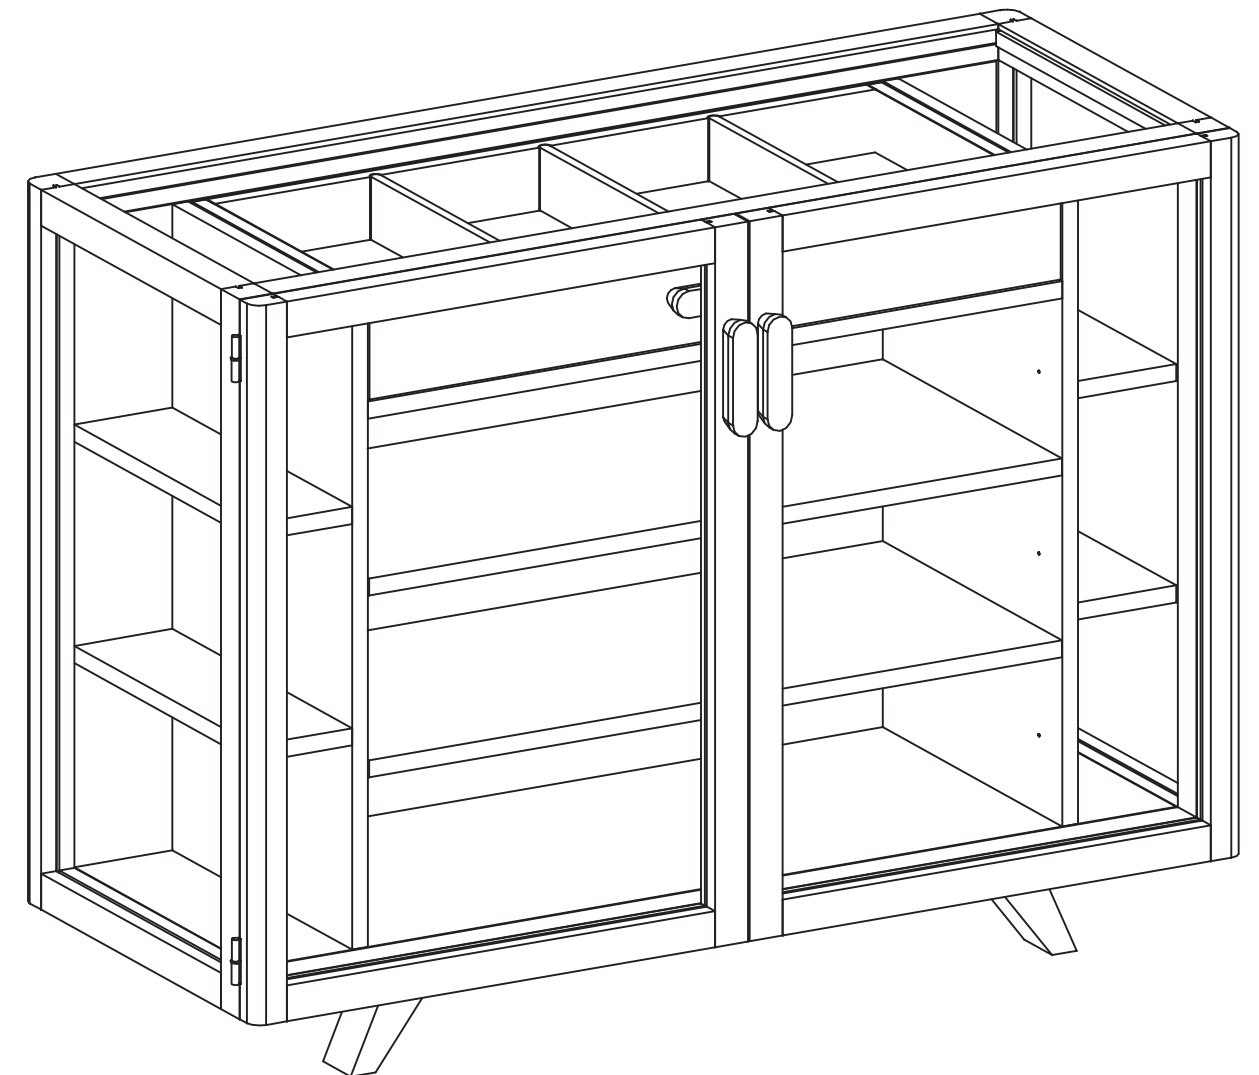

Vitrina cabinet – designed by Herve

In order to get pleasure and longevity from the product we would like to give you some information: -

- The unit is manufactured from solid oak, laquered MDF and glass.
- Craftsmen manufacture this product and there is variety between each unit. Wood is a natural product and colour and grain variations are inevitable.
- Natural timber is affected by sunlight; this can cause the colour to darken. For this reason (especially if placed in direct sunlight) it is recommended that placing objects long periods in the same position is avoided. This colour adjustment becomes less relevant with the passing of time. This is also relevant to the painted interior section.
- It is recommended that no abrasive cleaners or solvents are used to clean the unit, please only use proprietary furniture polishes or warm water with diluted detergent. For cleaning the glass we recommend using a damp microfiber cloth.

We thank you for purchasing the product and wish you many years of enjoyable and functional use.

**Step 1.** Remove the detachable bottom rail by gently pulling it towards yourself.

## Assembly Instructions

**Step 2.** Remove the height adjustable shelf from inside the cabinet.  
With assistance lift the interior section and carefully align the side of the interior unit with the glass cabinet, slide into place ensuring that it is pushed all the way to the back of the cabinet.  
Put the detachable bottom rail back into place and insert the height adjustable shelf using the supplied fittings.
