A guide to wall mounting and fixings

A guide to wall mounting and fixings

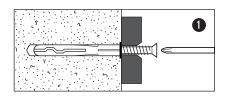

Serious or fatal crushing injuries can occur from furniture tipping over.

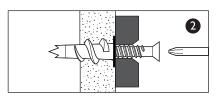

To prevent this funiture from tipping over it must be permanently fixed to the wall.

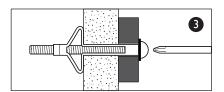

Wall fixing screws are not included, since different wall materials require different types of screws / fixings. Please ensure you use the correct screws / fixings for your type of walls and seek professional advice if you are not sure.

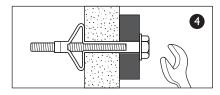

Failure of the product due to incorrect fixings is the responsibility of the installer.

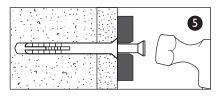

Important: When drilling into the walls always check that there are no hidden wires or pipes etc.

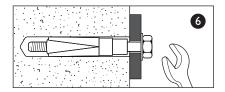

Types of walls

You can use one of the following types of wall plug if your walls are made of brick, breezeblock, concrete, stone or wood.

1. General purpose wall plug

Generally aerated blocks should not be used to support heavy loads, use a specialist fitting in this case. For light loads, general - purpose wall plugs can be used.

2. Plasterboard wall plug

For use when attaching light loads onto plasterboard partitions.

3. Cavity fixing wall plug

For use with plasterboard partitions or hollow wooden doors.

4. Cavity fixing - heavy duty wall plug

For use when fitting or supporting heavy loads such as shelving, wall cabinets and coat racks.

5. Hammer fixing wall plug

For use with walls stuck with plasterboard. The hammer fixing allows it to be fixed to the wall rather than the plasterboard. Always check the fixing is secure to the retaining wall.

6. Shield anchor wall plug - heavy loads

For use with heavier loads such as TV and Hi-Fi speakers and satellite dishes etc.

Care and maintenance

Safety: Periodically check all fittings and wall fixings to ensure they have not come loose and retighten as necessary.

Care guide

Care and maintenance

How to care for your glass and metal furniture

For glass elements use glass cleaner or soapy water for cleaning, do not use anything abrasive as this may damage the surface of the product. Note: Glass can scratch in normal use therefore please protect surfaces from scratches and marks by using mats and coasters.

Protect the metal elements from spillage, sunlight and heat. A slightly damp cloth is the best cleaning agent for the material. Dry and polish with a non abrasive soft cloth.

Do not use any abrasive cleaner or harsh detergent on the metal elements as this can damage the surface. Avoid spilling or dropping crumbs of food with a high fat content on the surface as this can permanently mark the metal.

Safety instructions

Never drag furniture when moving it, always lift it.

Periodically check all fixings to unsure none have come loose and retighten when necessary. Please take care when handling or moving the furniture as careless handling may cause damage or injury. Furniture can be dangerous if incorrectly installed. Assembly should be carried out by a competant person. No liability will be accepted for damage or injury caused by incorrectly installed or assembled furniture. It is recommended that before moving heavy objects to a new location they are completely dis-assembled to avoid personal injury or damage to the furniture. Please be careful to retain all fittings when doing this.

Glass furniture warning

Do not place very hot or very cold items glass surface(s) unless adequately thick table mats are used to prevent such items from coming into contact with the glass.

Do not sit or stand upon glass surface(s)

Do not use the glass as a chopping surface. Do not strike the glass with hard or pointed items.

Tempered glass is designed to break into very small fragments for customer safety. On very rare occasions including when not in direct use, glass can break for the following reasons:-Surface damage and scratches (protect the surface with mats during use). Please take extra care to ensure no heavy or sharp objects impact this product. -Extremes of temperature. Avoid areas where the item can become very hot and cold.

Safe Home - Furniture

At John Lewis we pride ourselves in developing product that is great quality, offering the best possible value for money.

We also care about your safety, engineering product to minimise any potential risk and providing you with information to enable you to make your home safe and prevent accidents from happening.

Furniture stability

Furniture stability and 'tipping or overturning' is of particular concern and it's important to consider the environment in which your furniture is being placed and who might come in to contact with it. For example small children may be attracted to toys placed out of reach and may use furniture as a ladder to retrieve them. The elderly may also use furniture to pull themselves up from low seating and even pets climbing on furniture could cause furniture to become unstable.

It's also recommended that heavy items such as TVs are positioned on furniture suitable for the job to prevent any risk of the furniture toppling over.

Other considerations to prevent accidents are how furniture is loaded. Heavier items should be positioned on lower shelves or lower drawers so that the furniture if more stable and less likely to topple.

Wall fixing or attachment devices

We would strongly recommend that all freestanding furniture over 60cm in height is attached to the wall for added safety. This is critical where babies and children have access and there is an increased risk of a toppling incident occurring.

Consider the type of wall that your furniture is to be positioned against when making your purchase and make sure that you use the correct wall fixings referring to the 'Wall anchoring guide' which you will find in your product instructions.

If in doubt about which wall fixings to use, or if you're concerned about your DIY competency seek expert advice from a qualified tradesperson.

Warning label

The following label can be found on own brand products and is affixed permanently. This should remain on the product for the duration of its life additionally offering guidance to customers that purchase the furniture in the second hand market.

In order to prevent overturning, this product must be used with the wall attachment device provided.
