User Manual Charter Floor Light

03/05/2017

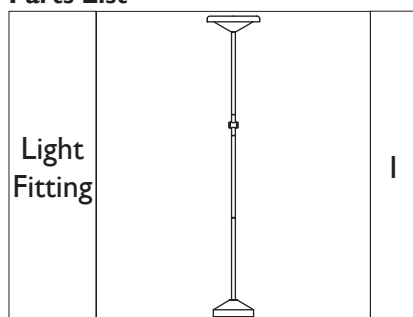

Thank you for purchasing this Charter Floor Light. Please read the instructions carefully before use to ensure safe and satisfactory operation of this product. Please keep these instructions for future reference.

Warnings!

III This product is **Class III (Low Voltage)** luminaire with the supplied transformer and can only be used with this supplied transformer. It does not require connection to earth. If the flexible external cable becomes damaged it should only be replaced by the manufacturer or suitably qualified person.

Please read these instructions carefully before commencing any work and keep them for future reference. For your safety, always switch off the supply before cleaning or adjusting shades. Your standard lamp has been packaged as eight separate parts to prevent damage during transit.

Parts List

Assembly

Refer to drawing opposite. Carefully unpack the carton, making sure all the parts are present before assembly.

Step 1

Do not attempt to plug in or use this product until it has been fully assembled. Disconnect from mains during assembly or maintenance.

Step 2

Remove all packaging, and remove any cable protection pieces in the ends of the tubes. Remove any protective plastic film.

Step 3

Screw the top section of the stem into the head of the lamp (1).

Step 4

Screw the top section of the stem into the middle (2), and then into the lower (3). Take care not to trap the cable or cross the thread.

Step 5

Locate the end of the completed stem on to the base (4). Gently pull any excess cable through from under the base and out through the side of the base. Screw the stem on to the base thread, taking care not to trap the cable or cross the threads.

Step 6

Stand the product upright and check the tightness of the joints. Your standard lamp is now ready to use. Connect the DC connector, (5) plug into the mains and switch on using the touch switch (6).
