Made in China

Thank you for purchasing this set of outdoor Solar path finders.

Important - Please read the instructions carefully before use to ensure safe and satisfactory operations of this product.

Charging and Operation

Before using the light set for the first time, the batteries will need to be fully charged. Allow approx. 10 hours of charging in daylight before use.

Warnings

This light set is for temporary outdoor use.

Do not connect the light set electrically to any other light set.

If required, only replace the rechargeable battery with the recommended type supplied (1 x AA NI-MH 600mAh).

This symbol indicates that batteries should not be disposed of in the normal household waste but taken to appropriate local recycling facilities, where and when these are available. Never throw batteries in a fire or attempt to open outer casing.

	Parts List	Qty		Parts List	Qty
A		4	B		4

Assembly

Carefully unpack the carton, make sure all parts are present before assembly.

Step 1

For this step you will require parts B. Attach the spikes together as shown in the diagram.

Step 2

Now that Step 1 is complete attach Part B to the four holes underneath Part A.

Step 3

Now that the assembly is complete set the power switch to "ON" and allow a full days charge in daylight. Charging time: Approx. 8-10 hours for a full charge.

Step 4

The light set will now automatically switch on at dusk and re-charge during the day. Install the lamp in direct sunlight and where it will be exposed for the longest time. Don't install the lamp where shadows from buildings or trees etc. will fall as this will reduce charging performance.

Care instructions

We recommend cleaning with a soft dry cloth. Do not use abrasive materials as these will damage the finish.
