User Manual

Ceramic Delaney
Easy Fit

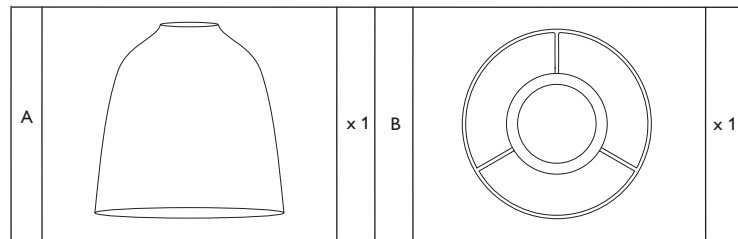

Thank you for purchasing this Ceramic Delaney Easy Fit. Please read the instructions carefully before use to ensure safe and satisfactory operations of this product.

Warnings!

To prevent electric shock, switch off the electricity supply before maintaining this product.
Ensure other persons cannot restore electricity supply without your knowledge.
Always use correct bulb type with the correct wattage as indicated in the specification table.
Never exceed the max power rating.
When changing a bulb always switch off at the mains first and allow the bulb to cool down before handling.
Dispose of used bulbs carefully.
The bulb and surrounding parts can become extremely hot during use.
For indoor use only.

Parts List

Care instructions

We recommend cleaning with a soft dry cloth. Do not use abrasive materials as these will damage the finish.

Assembly

Carefully unpack the carton, make sure all parts are present before assembly.

1. Turn off the light fitting at the wall and remove the lamp holder skirt from the lamp holder.
2. We would recommend two person assembly for this stage. Whilst one person is holding the shade "A", the other should guide the lamp holder through the shade "A" and gimbal ring "B", being careful not to damage or scratch the surface of the shade. See diagram below for guidance.
3. As one person securely holds the shade in place, screw the lamp holder skirt back onto the lamp holder, ensuring it is securely tightened.
4. Variations in the ceramics thickness will occasionally require minimal adjustment in order for the shade to hang straight on the gimbal ring. Whilst hanging, visually inspect the shade to determine if adjustment is necessary. You can carefully rotate the shade trying different positions in order to carefully counter balance the weight of the shade. Once happy with the positioning, allow the shade to sit on the gimbal ring "B".
5. Insert a bulb as per the recommended wattage.
