Important safety information

Warnings

- ⚠ The product should only be used on firm, level ground.
- ⚠ Keep small parts out of reach of children.
- ⚠ Ensure the product is fully assembled as illustrated before use.

Do's

- ✓ Check the pack and make sure you have all the parts listed.
- ✓ Check all screws or bolts are tightened and inspect regularly.
- ✓ Make sure the legs remain in contact with the ground at all times.

Don't's

- ✗ Do not over tighten screws or bolts.
- ✗ Do not stand on the product.
- ✗ Do not use power tools to construct as overtightening and panel failure may occur.

Your Drinks Cabinet

Wedge Instructions

Parts, fittings and tools

F

If the drinks cabinet is not level on your floor use the wedge (F) provided, and snap it off so that it does not protrude out from the cabinet's leg, you can also snap it lengthways if desired.

Wall Fixing Instructions

Parts, fittings and tools

1 Place your product in the final position. Loosen the screws on the metal brackets just enough so that the slotted bracket can be extended to meet the wall.

2 Then re-secure the screws.

3 Mark the wall for drilling through the hole in the short face of the bracket.

Then remove the unit from the wall so that the marked holes can be drilled.

Ensure you use an appropriate fixing type for your wall (see page 9). Then return the unit to position.

4 Secure the unit to the wall fixings with own screws through the brackets.

5 Finally add the extra securing screws to the holes in the long faces of the brackets.

Warning

Serious or fatal crushing injuries can occur from furniture tipping over. To prevent this furniture tipping over it must be permanently fixed to the wall.

Wall attached item only.

A guide to wall mounting and fixings

Warning

Serious or fatal crushing injuries can occur from furniture tipping over. To prevent this furniture from tipping over it must be permanently fixed to the wall.

Wall fixing screws are not included, since different wall materials require different types of screws / fixings. Please ensure you use the correct screws / fixings for your type of walls and seek professional advice if you are not sure.

Failure of the product due to incorrect fixings is the responsibility of the installer.

Important: When drilling into the walls always check that there are no hidden wires or pipes etc.

Types of walls

You can use one of the following types of wall plug if your walls are made of brick, breezeblock, concrete, stone or wood.

1. General Purpose wall plug

Generally aerated blocks should not be used to support heavy loads, use a specialist fitting in this case. For light loads, general - purpose wall plugs can be used.

2. Plasterboard wall plug

For use when attaching light loads on to plasterboard partitions.

3. Cavity Fixing wall plug

For use with plasterboard partitions or hollow wooden doors.

4. Cavity Fixing - Heavy Duty wall plug

For use when fitting or supporting heavy loads such as shelving, wall cabinets and coat racks.

5. Hammer Fixing wall plug

For use with walls stuck with plasterboard. The hammer fixing allows it to be fixed to the wall rather than the plasterboard. Always check the fixing is secure to the retaining wall.

6. Shield Anchor wall plug - Heavy loads

For use with heavier loads such as TV and Hi-Fi speakers and satellite dishes etc.

Safety: Periodically check all fittings and wall fixings to ensure they have not come loose and retighten as necessary.

Safety Instructions

General warnings

Never drag furniture when moving it, always lift it. Periodically check all fixings to ensure none have come loose and re-tighten where necessary. Please take care when handling or moving the furniture as careless handling may cause damage or injury. Furniture can be dangerous if incorrectly installed. Assembly should be carried out by a competent person. No liability will be accepted for damage or injury caused by incorrectly installed or assembled furniture.

Specific warnings for heavy items

It is recommended that before moving heavy objects to a new location they are completely dis-assembled to avoid personal injury or damage to the furniture. Please be careful to retain all fittings when doing this. (For fully or partial assemble items).

Storage units over 600mm

Installation shall be carried out exactly according to the manufacturer's instructions – otherwise a safety risk can occur if incorrectly installed; a warning shall be given to the consumer to notify them of related risks.

WARNING In order to prevent overturning this product must be used with the wall attachment device provided.

Warnings specifically for any product containing glass

If the glass is chipped or broken stop using the product and consult the manufacturer or supplier.

Tempered glass is designed to break into very small fragments for customer safety. On very rare occasions including when not in direct use, glass can break for the following reasons:

- Surface damage and scratches (protect the surface with mats during use). Please take extra care to ensure no heavy or sharp objects impact this product.
- Extremes of temperature. Avoid areas where the item can become very hot and cold.

WARNING:

- Do not place very hot or very cold items directly on glass surfaces.
- Do not sit or stand on glass surfaces.
- Do not strike the glass with hard or pointed items, or use the glass as a chopping surface.
- Do not use washing powders or any other substances containing abrasives, as these may scratch the glass.

Additional Requirements for tables

Handle with care! A damaged edge or scratched surface can in rare cases cause the glass to fail unexpectedly into many small pieces. Glass is most vulnerable when struck from the side.

Care Instructions

Wood Furniture

Wood displays different grain patterns depending on which way they cut - for example, the 'medullary ray' which can appear on oak furniture is a mark of good quality timber - these are just characteristics of the natural beauty of the wood. Some furniture is also deliberately aged and rustic.

All timber surfaces will change colour and mellow over time. New furniture will initially vary in shade from items that have been previously purchased.

How to care for your wood or painted furniture

Furniture with a hard lacquer, painted surface should be dusted with a dry cloth.

Make sure all surfaces are protected from heat and liquids by mats and coasters. Wipe up spills immediately and ensure that a mat or pad is placed under paper if you are writing.

Our furniture will endure most temperatures in the home but it is best to avoid placing furniture next to heat sources such as radiators or fires. Be particularly careful with solid wood as the lack of humidity caused by central heating can cause damage such as warping.

Glass

Use glass cleaner or soapy water for cleaning, do not use anything abrasive as this may damage the surface of the product.

Protect surfaces from scratches and marks by using mats and coasters.

Metal

Do not use any abrasive cleaner or harsh detergent as this can damage the surface.
