FABRIC YOU CAN CLEAN WITH JUST WATER

Aquaclean® technology is a revolutionary fabric treatment that allows you to clean stains using water only. This provides you with simple fabric maintenance in the minimum amount of time.

Aquaclean helps to remove the **majority of household stains** (wine, ink, sauce, fat, mud, chocolate, cream, etc.) making life easier and giving you more time for the more important things.

HOW DOES AQUACLEAN WORK?

Aquaclean® Technology is an advanced fabric protector for upholstery of all kinds. It's a treatment that covers every fibre with an invisible molecular layer that prevents dirt from penetrating the fabric.

Now, you can clean stains **with just water**

1. Remove any excess residue on the upholstery.
2. Apply water over the stain, either directly or using a damp cloth. Wait a few seconds.
3. Press down over the stain with the damp cloth and rub gently over the fabric using circular movements. If the stain does not come off completely, repeat the process as required.
